Olav Lyngberg leads a group focus on development and deployment of advanced technologies in the area of modeling, analytics, and sensors in Janssen Supply Chain. His group has enabled Janssen to transform key part of manufacturing into real-time, data-driven operations. Olav successfully introduced concepts of real time release, advanced process control and multi-variate analytics to enhance supply, reduce costs, and to improve lead time and reliability.

Olav holds a Ph.D. in Chemical Engineering from the University of Minnesota and a Master of Science degree in Chemical Engineering from The Technical University of Denmark.
