E-mail: Karoline.Bechtold-Peters@novartis.com

Karoline Bechtold-Peters is currently Director Science & Technology in the Scientific Office of Drug Product, Global Biologics & CGT, Technical Research & Development at Novartis Pharma AG in Switzerland, representing the focus on Innovation and External Engagement.

Karoline has more than 20 years of experience in biotechnology, especially in protein formulation and biologics device combination products, but also in aseptic manufacturing of biologics. She gained her experiences at Boehringer Ingelheim in Germany, as well as Roche/Genentech and Novartis in Switzerland.

She is active in various organizations such as APV, AAPS, PDA and EFPIA. In her capacity as a member of EFPIA's Biomanufacturing Working Group, she leads the Agile Aseptic Manufacturing subgroup, among others.
