Biologics Standardization

The Role of Real-World Evidence for Regulatory and Public Health Decision Making for Accelerated Vaccine Deployment

September 19-20, 2023
Park Inn Hotel, Leuven, Belgium

Miriam Sturkenboom, PhD

Head of the Department of Datascience
& Biostatistics
University Medical Center
Utrecht
The Netherlands

Miriam Sturkenboom is professor in Real World Evidence, a pharmacoepidemiologist, and head of the department of Datascience and Biostatistics at the Julius Center of University Medical Center Utrecht in the Netherlands. She was professor in Observational Data Analysis at the department of Medical Informatics at Erasmus MC until 2017. She is past president of the International Society for Pharmacoepidemiology. Her research interests focus on knowledge discovery from data collected in routine health care to improve evidence on drug and vaccine safety in particular in vulnerable populations (children, pregnancy and elderly). She is coordinator of the European commission funded ConcePTION project aiming to establish a tested system for the monitoring of benefits and risks of medicines in pregnancy, and is co-founder and president of the Vaccine Monitoring Collaboration for Europe (VAC4EU), she coordinated several EMA funded studies on COVID-19 vaccines. In terms of quantitative research outputs: she supervises/d more than 50 PhD students, has more than 400 peer reviewed papers in the area of pharmacovigilance, pharmacoepidemiology and medical informatics and an h-index of 93.
