Dr. Steven Black is a pediatric infectious disease specialist who has spent more than 30 years conducting clinical trials and safety studies of vaccines including being the principal investigator in five pivotal licensure trials and six phase four post marketing trials. He has also conducted numerous phase 1-2 clinical trials. He was also a principal investigator in the CDC sponsored Vaccine Safety Datalink and CISA projects. He is currently Emeritus Professor of Pediatrics at the University of Cincinnati and Children's Hospital in Ohio USA. He is also co-Director of the Global Vaccine Safety Data Network which is a global network to evaluate vaccine safety, effectiveness and risk benefit. He is most recently a work package lead for the SPEAC project to assist CEPI in the evaluation of their vaccine safety portfolio.
