

Giuliana Vozza

Scientist 1, AstraZeneca, United Kingdom

Giuliana Vozza is a Scientist 1 working at AstraZeneca within Bio-pharmaceutical Development, alongside process engineering, late stage formulation, device and drug delivery development teams. In this role her main focus relays to designing and executing experiments to support formulation recommendation for supply of non-GLP/GLP toxicology and clinical studies. Since joining AstraZeneca in 2018 Giuliana has taken on the position as lead formulation representative on cross-functional CMC team for tox/phase 1 clinical studies across several therapeutic areas such as Oncology, Respiratory & Inflammation.
