Noémie Deneyer is a Senior Manager and Associate GSK Fellow working as Molecular Biology Lead at GSK, with a focus on innovative analytical technologies including NGS. Noémie holds a PhD in Molecular and Cellular Biology from the UCLouvain, Belgium. In 2019, she started her journey at GSK where she was coordinating scientific projects aiming to deploy novel analytical methods for Quality Control testing. In January 2021, she joined the Global Quality Control department where Noémie and her team worked together to develop and implement Next Generation Sequencing in Quality Control to drive innovation and strengthen product safety. Since May 2024, Noémie joined the Manufacturing Sciences & Technology department where she is leading the strategical deployment of new analytical technologies and ensuring connections between Analytical R&D and Quality groups for molecular biology applications. Noémie is also involved in different external working and interest groups such as the AVDTIG where she had the chance to increase her engagement by becoming a co-chair in 2023.
