Dr. Robert Atterbury is Associate Professor in Microbiology at the School of Veterinary Medicine and Science at the University of Nottingham. Prior to this he was Research Fellow at the School of Life Sciences (2008 - 2010) and Senior Research Associate at the University of Bristol Department of Veterinary Medicine (2003 - 2008). His research focusses on the epidemiology and control of zoonotic pathogens such as *Salmonella*, *E. coli* and *Campylobacter* in poultry and pigs. He has a long-standing interest in the use of bacteriophage to treat infectious disease.
