Kimberly Schultz is Director of Division 2 in the Office of Gene Therapy at FDA's Office of Therapeutic Products in the Center for Biologics Evaluation. Kim joined the FDA in 2015 as a Commissioner's Fellow to conduct a cross-study analysis of CAR T cell CMC data and contributes to FDA review, guidance, and policy. Prior to joining the FDA, she received her PhD from the University of Wisconsin and conducted postdoctoral studies at Johns Hopkins Bloomberg School of Public Health specializing in virology and immunology.
