Bart van Montfort – PhD

Scientific Director/Lead Gene Therapy
and ExPEC in Analytical Development

Leiden, South Holland, Netherlands

Johnson & Johnson Innovative
Medicine

E-mail: bvanmont@its.jnj.com

Bart van Montfort is a seasoned professional in the biotechnology industry with over 20 years of experience specializing in analytical development and quality control. He holds an MSc in Molecular Sciences and a PhD in Biochemistry. Focused primarily on viral vectors for gene therapy and vaccines, Bart has played a pivotal role in several successful license applications, including the first licensed gene therapy product and the Janssen Covid Vaccine, and many clinical trial applications. His expertise lies in product specifications and their justifications, criticality analysis, integrated control strategy, and shelf-life claims.
