Dr. Valeria Runza is a Section Leader in Analytical Development, QC and Innovation for Biologics at Pharma Technical Development Europe, Roche. She has extensive experience in drug development in non-GMP and GMP analytical areas, focusing on method qualification and validation, control strategies, and product- and process-related impurities, in addition to leading automation- and IT-based strategies to improve performances. Her research interests include protein-protein interactions, potency assays, and the role of immune cell infiltration in tumor progression. Dr. Runza has a PhD in Genetics and Immunology from the University of Mainz, Germany, and a master's degree in Biotechnology from the National University of Quilmes, Argentina. She has numerous publications in peer-reviewed journals and holds several patents. Dr. Runza has also completed multiple leadership training programs and has received several grants and awards, including the Inventors' Silver Medal from Roche in 2022.
