3Rs implementation in veterinary vaccine batch-release testing: Current state-of-the-art and future opportunities

2022 event series co-organized by the AFSA Collaboration, HealthforAnimals and IABS-EU

The workshop aims to determine what is needed to facilitate alternative methods validation, implementation and regulatory acceptance, including global harmonization, of non-animal based batch release testing for veterinary vaccines.

After the two webinars where the current opportunities were presented from a scientific and technical perspective and where the perspective from European, North and South America, and Asia stakeholders was shared, the workshop will focus on challenges to be addressed and concrete actions or future projects that will be pushing for further methods' implementation and regulatory acceptance.

Other events:

Europe & Americas Webinar
October 6, 2022

Asia Webinar – **October 20, 2022**

Venue:

Pullman Brussels Centre Midi
Pl. Victor Horta 1
1060 Brussels, Belgium

Only on invitation

www.iabs.org

Program:

1. Keynote presentation
 2. Implementation of new methods for legacy products, new products with no animal testing. Industry experience and open challenges
 3. Acceptance of new methods or new products with no animal testing. Regulatory experience and open challenges
 4. Summary of the challenges
- Group 1:** Can you help us to make new methods transfer streamlined to the majority of companies?
Group 2: Can you help us to align regulations worldwide?
5. Wrap up and next steps
