**Animal Testing Replacement for Vaccines.
A One Health View: Global Outlook and Future Strategy**
December 2-4, 2025
Bangkok, Thailand

One Health drives for New Approach Methodologies (NAMs) approaches for Vaccine Batch release

The talk will cover at a high level why vaccines and the continuity of supply of consistent high quality, cost effective, safe and efficacious vaccines is so critical for One Health. Addressing the challenges with current animal based batch release tests in delivering this and how a transitions to NAMs in vitro approaches can help us deliver this.
